PROFILE

Computer Science graduate with experience building **distributed Big Data processing and ETL pipelines across 1M+ records** using Python, SQL, Apache Spark, and Airflow, cutting analytics latency by **30%**. Hands-on with **Google Cloud Platform (GCP), BigQuery, Looker, relational/NoSQL databases, data quality, Docker, and CI/CD**, spanning cloud data processing, analytics, and machine learning.

EXPERIENCE

AI Evaluation & Research Fellow — Handshake AI *Jul 2026 – Present | Remote*

Projects: Dynamo & Seal

- Developed and troubleshot **terminal-based data-processing and systems workloads** for evaluating autonomous AI agents using **Python, Bash, Docker, and Terminal-Bench**, creating reproducible environments for agent execution and evaluation.
- Designed and validated **pytest-based automated verifiers** to assess task completion, edge cases, expected outputs, and failure conditions while reducing false-positive evaluation results.
- Evaluated agent reliability across repeated execution trials using **pass@k evaluation**, investigating unsuccessful trajectories, environment failures, timeout behaviour, and workload-level issues.

Data Science Intern — Celebal Technologies *Jun 2024 – Aug 2024 | Remote*

- Engineered **distributed data-processing and ETL pipelines** across **1M+ records** using Python, SQL, Apache Spark, and Airflow, reducing analytics workflow latency by **30%**.
- Performed data transformation, validation, and quality checks on structured datasets before downstream analytics and reporting, improving reliability of processed data.
- Transformed processed datasets into interactive **Power BI dashboards and business reports**, reducing stakeholder reporting turnaround by **40%**.

Game Developer Intern — Mobtions *Dec 2024 – Jun 2025 | Bangalore*

- Developed, troubleshot, and optimised **18 cross-platform software products**, improving application performance and load times by **25% across 5K+ users**.
- Diagnosed application performance issues and implemented optimisation improvements across interactive software components.
- Integrated **REST APIs** and application data into product workflows to support dynamic functionality and data-driven improvements.

PROJECTS

Employee Payroll Management System *Oracle Database | SQL | PL/SQL*

- Designed a relational payroll-management system using **Oracle Database, SQL, and PL/SQL** to manage payroll information across **100+ employee records**.
- Implemented **stored procedures and database triggers** to automate payroll operations and enforce business rules at the database level.
- Added validation and integrity controls to prevent invalid or inconsistent payroll records, reducing manual processing errors and improving **data quality**.

Sales Insight Dashboard *Power BI | DAX | SQL*

- Built an interactive **Power BI analytics dashboard** using structured sales data across **50K+ records**, transforming raw information into business-ready reporting.
- Developed and optimised **DAX calculations** for **10+ business KPIs**, enabling analysis of sales and performance trends across dashboard dimensions.
- Used SQL-based data transformation and optimised reporting logic to reduce report-generation time by approximately **30%**.

Automatic Number Plate Recognition *Python | YOLOv8 | EasyOCR*

- Developed an automated **ANPR pipeline** using Python, YOLOv8, and EasyOCR to detect vehicle number plates and extract registration text from images.
- Integrated **YOLOv8 object detection** with OCR-based text extraction to create a near-real-time end-to-end inference workflow.
- Evaluated the system across **1,000+ images**, achieving **99.5% reported accuracy** under the project's evaluation setup.

TECHNICAL SKILLS

Cloud & Data:
Google Cloud Platform (GCP), BigQuery, Looker, Apache Spark, Apache Airflow, ETL, Big Data, Distributed Data Processing, Data Pipelines, Data Quality

Programming & Databases:
Python, SQL, Bash, PostgreSQL, MongoDB, MySQL, Oracle Database, PL/SQL, NoSQL

DevOps & ML:
Docker, GitHub Actions, CI/CD, Pytest, Scikit-learn, LightGBM, TensorFlow, Pandas, Power BI

AI Engineering:
LLM Evaluation, Terminal-Bench, Multi-Agent Workflows, Agent Development Kit (ADK)

GOOGLE CLOUD CREDENTIALS

- **Engineer AI Agents with ADK** – 2026
- **Predictive Data Analysis in BigQuery** – 2023
- **Data Models in Looker** – 2023
- **Store, Process & Manage Data on Google Cloud** – 2023
- **Monitor & Manage Google Cloud Resources** – 2023

CERTIFICATIONS

- OCI Data Science Professional
- OCI Generative AI Professional
- Oracle AI Cloud Database Services Professional
- Oracle Database@AWS Architect

EDUCATION

B.Tech, Computer Science Engineering
KIIT 2021 – 2025
CGPA: **7.82/10**

Higher Secondary
Army Public School, Pune 2020 – 2021
Percentage: **91%**
